Frequently Asked Questions

Do I need a credit card or purchase order to sign up for the trial?

No. Our trial is 100% risk-free for you and your organization. All we need to create your account is some basic information about your organization ... and about three minutes of your time.

Is there a time limit on the trial?

No. You can experiment with the trial as long as you'd like, although you're limited to ten users.

The feature I'm most interested in isn't available in my Trial account. Is there any way I could take it for a test drive?

Absolutely! [Contact us](#) and let us know what you're looking for, and we'd be happy to give you a demonstration and/or activate the feature in your Trial account.

What's a user?

A user is an individual who logs on to the SmarterSelect website using a unique e-mail address. Users are all of the admins, evaluators, and applicants who access your application. The user count for annual subscription purposes is based on the number of users who log into the site during your subscription period.

What's a program?

A program is anything that you want people to apply for. It could be a scholarship, grant, recognition award, contest, report, test, certification, survey, etc.

Can an applicant apply to more than one application or program?

Yes. Applicants can apply to as many programs as you have created. The user will only count once for purposes of your annual user count.

How does your billing work?

We are an annual subscription service. You pay for one year's worth of service at the beginning of your subscription period and at each annual renewal. We will send you an invoice annually via e-mail. We accept payment via check or credit card.

NEW?

I'm ready to switch to a paid account. What now?

Great! Just [contact us](#), and we'll upgrade you right away!

Help and Support

Tell me about your support.

As part of your annual subscription, technical support is provided via e-mail, phone, and web conference. Also, you will receive access to the [SmarterSelect On-Line Support Site](#), which provides user help, setup information, how-to answers, videos, and a community forum to help with common questions and suggestions.

Are there any set up, maintenance, or support fees?

Nope! You're provided a free web conference training session when you sign up for our service. Our support and any updates are included in your annual subscription price.

Can you create my programs and applications for me?

The majority of clients find our service so easy to use that they create their own programs and applications following our training session. However, if you are short on time or would like to benefit from our best practices, please contact us for a quote for administrative services.

How do I contact you with questions or problems?

Please access our [Smarter Select On-Line Support Site](#) and submit a support request. All emails are responded to within one business day.
